Carlos Lauchu Principal

Welcome to The Science Academy STEM Magnet!!

Our mission is to provide opportunities for all students to become motivated, life-long learners. We provide a safe environment where our students are encouraged to become self-reliant and disciplined citizens. We promote academic and character development as we foster individuality, creativity, and teamwork. Our students will possess the knowledge and skills necessary to pursue their academic and career goals and to be mentally and physically healthy, analytic learners.

We offer many opportunities at The Science Academy. Your child will be taught by a dedicated and conscientious group of teachers, administrators and support staff. While we are proud of the fact that we have the highest Middle School SBAC test scores in the country, our emphasis is "child first, student second", as we want our students to be accomplished, well-rounded individuals

Parents are required to be part of our school community and active partners in their children's lives and education. We encourage parents to check agenda books, review students' work on a daily basis and maintain communication with teachers via Schoology and email to help monitor their child's progress and success. Please visit our school website for all the latest information.

Additionally, we provide programs at The Science Academy that help motivate and encourage students to enjoy learning and have a positive school experience, both during and after school. We hope our parents will take advantage of our Parent Center and take part in other parent organizations including our SciFi fundraising group.

We look forward to an exceptional year and your participation in it.

Sincerely,
